

# HOPE

Navigating Autoimmune Encephalitis  
with Texas Children's Hospital

## JULY 28, 2018 AE FAMILY DAY OF HOPE

- Autoimmune Encephalitis (AE) is a rare condition that disrupts normal communication in different areas of the brain
- There is hope because research indicates that early recognition, accurate diagnosis, followed by prompt treatment leads to better patient outcomes
- We are proud to present a day of education for families and children with AE
- Featuring physicians, nurses, neuropsychologists, therapists, and child life staff
